## Direct Debit Payment Plans

Easy and economical

# Paying by Direct Debit: over half of our customers have already opted for this payment method. Why not you?

In order to simplify your life as well as to save you money, SEOLIS offers you the benefits of two different ways to pay your energy bills by Direct Debit. You can choose to pay either monthly or on your energy bill due date (3 bills per year).

## ➤ MONTHLY PAYMENT

**Lighten the load...  
spread the cost over the year!**

After a study of your past bills or based on an estimation, SEOLIS will calculate your annual consumption and provide you with a payment schedule. This will show 10 identical monthly payments and then, following a formal meter reading, any outstanding amount due will be debited in months 11 and 12.

If the final cost of your annual energy consumption is lower than the total amount already paid by monthly payments then a **reimbursement will be credited to your account within 5 days.**

You have the **choice of four different direct debit payment dates:** the 5<sup>th</sup>, 10<sup>th</sup>, 15<sup>th</sup> or 20<sup>th</sup> of each month.

## ➤ DIRECT DEBIT PAYMENT ON BILL DUE DATE

**A feeling of total freedom!**

As usual, you receive your bill every 4 months but you will save time and money: the amount of your bill is automatically debited from your account.

Another benefit of this option is that you can be away from home for long periods without worrying about non-payment of your bill and any subsequent late payment penalties.

## Paying by Direct Debit... nothing but advantages!

### ➤ EASY

With Direct Debit payments you no longer have to worry about paying on time or filling out cheques... making life easier.

What's more, **you can, at any moment, cancel your Direct Debit without incurring any charges** and opt for a different payment method. At SEOLIS, the choice is yours!

### ➤ ECONOMICAL

No more envelopes to find stamps for every time the bill arrives! So, every month you will be saving money. At SEOLIS, **paying by Direct Debit is a free service!**

### ➤ ECO-FRIENDLY

Let's work together, using today's technology to reduce our carbon footprint! Less paper means less transport which, in turn, means less carbon emissions into the atmosphere.

In addition, don't forget that the cost of 3 stamps is the equivalent of 20 KWh of electricity which is the same as using a 15 W low energy lamp for nearly 1 500 hours.

**To set up your Direct Debit** simply take your Bank details and contact us.
